TERENCE ENCARNACION TAGAYONA

Software Engineer • Full-Stack Web Developer

terence.tagayona@gmail.com | 09692028121 | github.com/Terence1925 | terence-portfolio.base44.app

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of hands-on experience building, debugging, and deploying web applications using React, Node.js, and PHP. Combines technical implementation skills—leveraging modern AI-assisted development tools for rapid debugging—with over a decade of international account management experience. Proven track record of delivering clean UI components, REST API integrations, and scalable client platforms for remote global teams.

TECHNICAL SKILLS

Frontend	React, Next.js, JavaScript (ES6+), TypeScript, Tailwind CSS, HTML5, CSS3
Backend	Node.js, PHP, Python, REST APIs, GraphQL, PostgreSQL, MySQL, MongoDB
Tools & Workflows	Git, GitHub, Postman, Docker, AWS, AI Automation & Debugging Tools, VS Code

PROFESSIONAL EXPERIENCE

Software Engineer / Web Developer — Sparksoft Solutions **2024 – Present | Remote**

- Architected and deployed responsive web applications using React, Node.js, and PHP, consistently meeting client sprint deadlines.
- Designed and integrated custom RESTful APIs and cloud services, enhancing application performance, scalability, and real-time data synchronization.
- Utilized AI-powered development tools and workflow automation scripts to accelerate bug fixes, refactor legacy code, and optimize production build cycles.
- Collaborated seamlessly with remote cross-functional engineering teams using Git workflows, Slack, and containerized Docker environments.

Sales Account Manager / Business Development Manager — Dell, Alorica, VXI, Amtec Global **Prior – 2024 | Metro Manila**

- Managed high-value account relationships and client success operations for global enterprise clients (e.g., Dell).
- Translated complex client business requirements into actionable technical solutions, driving high customer retention and satisfaction.
- Demonstrated exceptional written and verbal English communication, dispute resolution, and executive stakeholder reporting under pressure.

FEATURED PROJECTS

SalesOffshore Client Platform **(React, Node.js, Tailwind CSS, REST APIs)** – **salesoffshore.com**

- Developed and deployed a custom web platform for offshore sales talent solutions, focusing on high-converting UI/UX, responsive mobile layouts, and seamless lead intake API integrations.

Data Dashboard **(React, Node.js, Chart Libraries, REST APIs)**

- Built a real-time data visualization dashboard connecting REST APIs to dynamic chart libraries, enabling business stakeholders to analyze key metrics instantly and accelerate decision-making speed.

Responsive Portfolio Website **(React, Express.js, Tailwind CSS)**

- Designed and deployed a mobile-optimized personal portfolio featuring dynamic backend API integration for direct lead capture and instant client contact submission.

EDUCATION

Bachelor of Science in Nursing — Perpetual Help College Manila **Graduated**
