TERENCE ENCARNACION TAGAYONA

Software Engineer • Full-Stack Web Developer

terence.tagayona@gmail.com | +63 969 202 8121 | github.com/Terence1925 | terencetagayona.netlify.app | Pasig City, Philippines

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of hands-on experience building and shipping full-stack web applications with React, Node.js, and PHP — most recently as part of the engineering team behind a production benefits-management platform used by a Quezon City government department. Brings 10+ years of enterprise account management experience (Dell, Amtec Global) to every engagement, translating business requirements into working software and communicating clearly with stakeholders under deadline pressure. Comfortable leveraging AI-assisted development workflows to accelerate debugging, iteration, and delivery.

TECHNICAL SKILLS

Frontend	React, Next.js, JavaScript (ES6+), TypeScript, Tailwind CSS, Material UI, HTML5, CSS3
Backend	Node.js, Express, PHP, Laravel, Python, REST & GraphQL APIs, MySQL, PostgreSQL, MongoDB
Cloud & Tools	AWS S3, Google BigQuery, Docker, Git, CI/CD, Postman, AI-assisted development workflows

PROFESSIONAL EXPERIENCE

Software Engineer / Web Developer — Sparksoft Solutions **2024 – Present | Remote**

- Built and deployed full-stack features for the QC-SSDD Service Tracker, a production benefits-management platform used department-wide by Quezon City's Social Services Development Department — including role-based approval workflows and 30+ reporting endpoints synced to Google BigQuery.
- Contributed case-management features and security hardening (WAF rules, A+ security headers, origin allowlisting) to the Kabahagi Case Management System, a lead/case-tracking platform for social services casework.
- Designed and integrated RESTful APIs and cloud services — AWS S3 document storage, JWT authentication, Socket.io real-time sync — across both platforms.
- Collaborated with a remote engineering team via Git workflows and TDD, using AI-assisted tooling to accelerate debugging and iteration on production code.

Sales Account Manager / Business Development — Dell, Amtec Global, Alorica, VXI **Prior – 2024 | Metro Manila**

- Managed enterprise account relationships and renewals for global clients, including Dell.
- Translated complex client requirements into actionable technical plans under deadline pressure.
- Led B2B lead generation and closed high-value deals across US markets.

FEATURED PROJECTS

QC-SSDD Service Tracker *(React, Node.js, Express, MySQL, AWS S3, BigQuery, Socket.io)* **— qc-ssdd.sparksoft-apps.com**

- Full-stack benefits-management platform replacing paper-based tracking for a city government department; built transaction, reporting, and disaster-relief module features as part of a small engineering team.

Kabahagi Case Management System *(PHP, CodeIgniter, MySQL, AWS SDK)*

- Hardened case and lead-management platform for social services casework; contributed Kanban tracking features, duplicate-client prevention, and security hardening. In active development.

Sales Offshore — Company Website *(React, Vite, Tailwind CSS)* **— salesoffshoreph.com**

- Solo-built, end to end: a conversion-focused marketing site for an outsourced sales-staffing agency, deployed on Hostinger.

CERTIFICATIONS

- Introduction to Web Development with HTML, CSS, JavaScript — *IBM / Coursera, Feb 2024*
- Full Stack Web Development — 12-week program — *KodeGo, Apr 2024*
- The Complete 2024 Web Development Bootcamp, 61.5 hrs — *Udemy, Jun 2024*

EDUCATION

Bachelor of Science in Nursing — Perpetual Help College, Manila *(Graduated)*
